

PERMATECH® Thimbles

Precision Cast for Billet Casting

Permatech has been recognized for many years as the premier supplier of precast thimbles for billet casting tables. Permatech's fused silica thimbles are inert to molten aluminum and its alloys and offers high-strength even at elevated temperatures. Permatech thimbles are engineered to OEM specifications to assure precision cast parts for both horizontal and vertical table designs. Our smooth inner surface quality helps reduce build up and reduces maintenance needs on these parts.

Permatech's engineers and billet casting specialist offer in plant expertise and consultation which is reflective of our many years of experience.

PERMATECH® ADVANTAGE

Non-wetting to molten aluminum

Maintains strength

Long service life

Precision cast for high tolerances

Smooth surface quality

Meets Wagstaff specifications

Inventoried item

*Engineered for
Maximum Productivity*
